Product Designer • Terminal April 2022 - November 2022

- Led design for a 0 → 1 product and shipped it in 4 months
- Rebranded and owned the design system for Terminal's B2B product
- Created concepts, wireframes, and high-fidelity prototypes to communicate product vision to product team, developers, and stakeholders
- Collaborated with product and engineering to develop processes enabling the team to ship new features, fast

Product Designer • Tourial November 2021 - April 2022

- Interviewed users to conduct product discovery, refine personas, validate prototypes, and drive new feature iterations
- Developed designer-developer handoff processes
- Designed a form builder, chrome extension, and collaborative editing experience
- Worked on initial concept designs and visual rebranding

UX Designer • RoadSync August 2020 - November 2021

- Delivered wireframes, mockups, and prototypes across mobile and desktop devices
- Crafted an extensible design system to standardize the user experience across RoadSync's 4 product offerings
- Created branded visual design assets including illustrations, icons, and advertisements
- Owned user research and persona development
